Your Credentials

® Registered Podortho Foot Specialists are Registered Nurses (Registered Practical Nurse /Registered Nurse) that have obtained post graduate studies in the field of Advanced Medical Foot and lower limb Care. The primary objective of a Podortho Foot Specialist is to optimize foot health, improve client mobility and overall Health Related Quality of Life. This is achieved by performing lower leg and foot assessments, which has been known to detect early signs of life threatening diseases or disabling conditions In conjunction, Podortho Foot Specialists use the Nursing Process to assess and diagnose, develop and implement a plan of care, and evaluate patient outcomes, while working as part of an interdisciplinary health care team or independently to ultimately provide adequate quality client care.
